INDEPENDENT SOFTWARE VENDOR

Now you can fit even the **LARGEST DOCUMENTS** into your archival workflow

Anyone who scans paper documents to digital files for archiving knows what a hassle oversized documents can be. Whether you use a separate application or pay for a scanning service to handle them, it costs time and money. The Contex ISIS driver changes all that and lets you scan large documents directly into your Enterprise Document/Content Management workflow.

What is ISIS?

The word "ISIS" is an acronym for "Image and Scanner Interface Specification." ISIS is an image import driver that offers a method for capturing images directly into software applications.

ISIS has found widespread acceptance in the Enterprise Document/Content Management (EDM/ECM) world, where it is supported by all major applications. It is fast and uses a standardized user-interface for all supported scanners to interface seamlessly with software applications.

The ISIS Corporation specification is developed and maintained by EMC Corporation, who also developed the ISIS driver for Contex SD and XD scanners.

Single point of control

The benefits of an ISIS-enabled Contex wide format scanner start with the end user. Operators working with scanners and an EDM/ECM or Capture software application no longer have to leave their familiar interface to deal with oversized documents. Maps, technical drawings, blueprints and other large documents are now scanned just like ordinary sized documents.

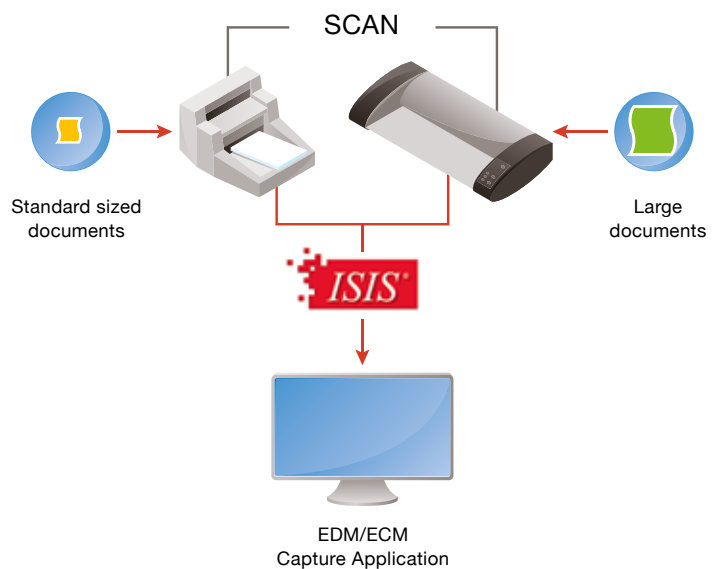

Quick return on investment

If your office deals with just 10 oversized documents per week, an ISIS-enabled Contex scanner can pay for itself in less than a year - and that's just the cost of sending documents out of house for scanning. A familiar user interface means no additional training is needed, while simple one-step scanning directly into your EDM/ECM archive saves even more time and money. You'll regain your investment cost in no time.

Key Features

- Lets you use your current EDM/ECM solution to capture and store large format documents just like standard sizes
- No more costs and delays resulting from sending documents larger than A3 or B-size to a service provider
- Works with all major EDM/ECM products such as Documentum, Rio, FileNet, PaperVision
- Works with major Capture applications such as QuickScan Pro, Kodak Capture Pro, Kofax Capture
- Award-winning Contex quality – get ultra-clean, accurate scans the first time around
- Certified with all Contex XD24" and SD44" scanners.

Contex ISIS Solution

SPECIFICATIONS:	
Compatible scanners	Available for purchase with Contex ISIS driver software license Contex XD2490, Contex SD4410, Contex SD4430, Contex SD4450, Contex SD4490
ISIS-compatible software application	Including solutions from EMC, Kodak, Laserfiche, Kofax, Digitech, IBM, and many others
Scanning resolution	100, 200, 300, 400, 600, 1200dpi
Maximum scan size	XD scanner: 24 x 197 inches (610 x 5000mm) SD scanner: 44 x 197 inches (1118 x 5000mm)
System requirements	1.6GHz Intel Core2 Duo or faster processor 2GB RAM (4GB recommended) High-speed USB 2.0 interface
Operating systems	32 or 64-bit Windows 7, Vista, and XP
Supported languages	English, Spanish, German, French, Portuguese, Russian, Japanese, Chinese (simplified)
